

FASTFACTS

Bose Music Amplifier

For Passive Speakers

TRANSFORMATIVE SOUND EXPERIENCE

Powerful sound performance.

Elevate the sound in any area of your home when you connect a pair of passive speakers to the Bose Music Amplifier. Kick it up a notch more by adding two pairs of speakers and a Bose Bass Module for a breathtaking, unmatched audio experience.

• Works on the Bose ecosystem

Once speakers are connected to the amplifier, they automatically become part of the Bose ecosystem making it seamless for you to use with other Bose smart speakers and smart soundbars.

Hear what you want, any way you want •

Wirelessly stream your favorite content or from external sources connected to the amplifier. You can then group with other Bose smart speakers, smart soundbars, or compatible Bose *Bluetooth*® speakers and headphones using SimpleSync so you can hear what you want, where you want, and how you want.
